Here is a pro tip that many experienced users swear by when working with Freightos Migration Spreadsheet: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. This approach keeps your main sheet clean and makes it easy to update reference data without touching your core records. It also means that if fee structures change, you only need to update one cell instead of hundreds of rows. Trust us, this simple habit will save you countless hours.

A common question we get asked about Freightos Migration Spreadsheet is whether it is better to buy in bulk or stick to individual orders. The answer depends on several factors, including the type of product, the shipping method, and your storage capacity. For lightweight items like phone cases and accessories, bulk ordering usually results in lower per-unit shipping costs. However, for heavier items like electronics or furniture, the savings from bulk ordering may be offset by increased shipping weight. Our advice is to start with a small test order to evaluate product quality before committing to a larger purchase.

A common pitfall that catches many Freightos Migration Spreadsheet users off guard is currency conversion fees. Many platforms display prices in USD or EUR but process payments in a different currency. This can result in unfavorable exchange rates and hidden fees that are not immediately visible. We recommend using a currency conversion tool or a fee-free debit card like Wise to make international payments. This gives you the real exchange rate and can save you 3-5% on each transaction compared to using a standard credit card.
