Here is a pro tip that many experienced users swear by when working with Acbuy Spreadsheet For Small Businesses: create a separate sheet for your reference data. This includes things like shipping carrier rates, tax brackets, platform fee structures, and common product categories. Then use VLOOKUP or INDEX-MATCH to pull this data into your main tracking sheet. This approach keeps your main sheet clean and makes it easy to update reference data without touching your core records. It also means that if fee structures change, you only need to update one cell instead of hundreds of rows. Trust us, this simple habit will save you countless hours.

When it comes to making purchases through Acbuy Spreadsheet For Small Businesses, knowing where to look for the best deals can save you a significant amount of money. Many users do not realize that prices can vary depending on the time of day, the payment method used, and even the browser you are using. We have found that comparing prices across at least three different sources before making a purchase consistently leads to savings of 10-25%.
