One of the most common mistakes people make when setting up Kegunao Spreadsheet For Collectors is skipping the configuration step. It might be tempting to jump straight into adding data, but taking ten minutes to configure your columns, formulas, and formatting rules will save you hours down the road. Start by defining your column headers clearly. For example, if you are tracking orders, you will want columns for order number, date, item name, quantity, unit price, shipping cost, total cost, tracking number, and status. Use data validation to create dropdown menus for fields like status and payment method. This prevents typos and makes filtering much easier.

Shipping insurance is something that many buyers overlook when using Kegunao Spreadsheet For Collectors, but it can be a worthwhile investment for higher-value orders. Most platforms offer some form of shipping protection, but the coverage details vary. Read the fine print carefully to understand what is and is not covered. In our experience, the small additional cost of insurance is worth the peace of mind, especially for orders exceeding \$100. If a package gets lost or damaged, having insurance dramatically simplifies the refund process and reduces the amount of time you spend dealing with disputes.

Tools like Google Apps Script, Zapier, or n8n can automate repetitive tasks like copying data between sheets, sending notifications when order statuses change, or generating summary reports at the end of each week. You do not need to be a developer to set up basic automations. Many platforms offer pre-built templates and tutorials that walk you through the process step by step. Start with one simple automation and gradually build from there as you become more comfortable.
